1. Energy savings: This property offers a crucial competitive advantage: a high-quality 5 kW solar panel system (12 panels) with battery storage. This significant investment allows the home to generate a considerable amount of energy, virtually eliminating monthly electricity costs, a rare and valuable asset in a central location. The solar electricity system and 300-liter solar water heater guarantee huge long-term savings on utility costs. This is a five-figure investment that is already completed and legalized for the new owner.
2. Private garden of 118 m²; there is plenty of outdoor space and it is very functional. Covered porch with 10 m² barbecue, perfect for outdoor dining.
3. Two private parking spaces within the plot. Other key improvements: new electrical panel (2020), updated water systems, double glazing, and security door. This is a unique opportunity to acquire a renovated, highly energy-efficient townhouse with minimal maintenance costs and a central, quiet location in the booming Estepona market. With this investment, you can enjoy a smart, low-cost lifestyle from day one.
